CANOHM

VSB-100

Universal Soundbar Bracket

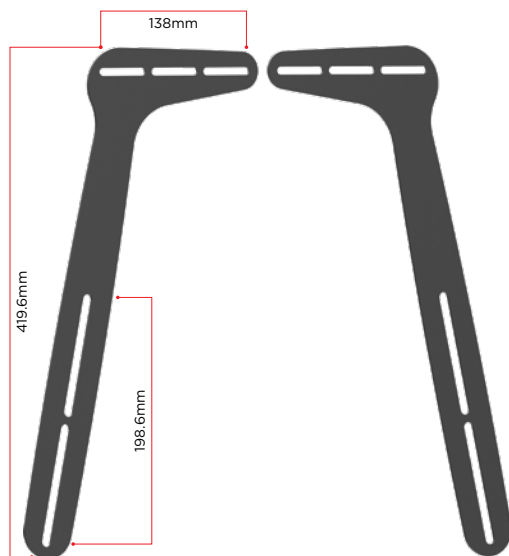

Features

The Ezymount VSB-100 universal soundbar mount gives you the ability to attach a soundbar directly onto a flat panel TV (above or below) instead of mounting it to the wall.

The advantage of mounting a soundbar directly onto a flat panel TV is, no matter what angle the TV is viewed, the soundbar will be set at the same angle, helping you achieve the very best visual and sound experience.

The soundbar mounts are attached using the mounting holes on the back of the TV, giving you the option to mount the soundbar either above or below the TV. The mount can also be attached when a TV is freestanding on an entertainment unit or affixed to a wall using a tilt, turn or flat TV wall mount.

Quality. The Ezymount VSB-100 Soundbar mount is made from quality materials and is covered by a ten year warranty.

Package includes

Soundbar mount x 2, mounting hardware and installation instructions.
