## Description

SANGEAN ATS-909 series has been widely regarded by many radio enthusiasts as one of the best portable shortwave radios on the market. Now with the new and improved 2nd generation, the ATS-909X2 we've made some significant improvements over the functionality while refining the already-excellent features from the original model. Another worthy upgrade is the newly designed smart battery compartment. The radio will now be able to detect faulty batteries and locate its position in the battery compartment when plugged in for charging under standby mode.
